

Waste Management Guide

All ships visiting the Port of Kantvik are to follow these instructions. The guide does not apply to ships that are exempted from the mandatory delivery of ship-generated waste (proof of exemption must be presented to the port). Ships are charged a waste fee in accordance with the port's price list, regardless of whether the ship leaves ship-generated waste in the port or not. Solid waste, bigger units such as domestic appliances, mattresses, furniture etc. are to be agreed. Expenses charged separately.

Ships must leave all ship-generated waste and cargo residues at port reception facilities in accordance with the discharge provisions based on MARPOL 73/78. An advance notification of waste delivery must be given by ships through the PortNet system at least 24 hours before arrival to the port. If the travel time is less than 24 hours, the notification should be given immediately after leaving the previous port. The waste notification should also be sent to the Port Control by e-mail, so that a pick-up service can be ordered in advance for wastes for which there is no fixed waste reception facilities in the port.

Fixed waste reception facilities

Based on the waste notification, The Port of Kantvik will arrange the waste collection as described below. Sorted garbage can be delivered to the waste containers as follows:

- metal waste
- glass packages
- plastic packages
- solid oily waste
- paper
- cardboard
- cooking oil
- biowaste
- mixed waste
- battery / accu
- WEEE
- paints / solvents

Port will deliver 60/240/660 l container alongside the ship based on the waste notification. The waste containers have labels indicating which waste the container is intended for.

Waste reception by order

- Oily liquid wastes as sludge, bilgewater and other oily waters. Transportation is ordered, emptying into suction truck.
- Sewage. Transportation is ordered, emptying into suction truck.
- Washing water. Transportation is ordered, emptying into suction truck.
- Exhaust gas purification waste - IMDG/ADR/RID code cargo waste
- Hazardous waste such as pyrotechnicals etc. must be agreed.
